## Office Action Summary

Application No.	10/582,346	
Examiner	MATSUI, HIROKI	
Vishal Patel	Art Unit 3673	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 12, "first screw projections formed from the slope surface...sliding surface", how can the first screw projections formed from the slope surface. Applicant should change it to --first screw projections formed on the slope surface and the sliding surface, the first screw projections extend from the slope surface to a middle of the sliding surface--.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Furuyama (JP 2003254439 A).

Furuyama discloses a sealing device having a sealing lip. The sealing lip having a sliding surface (10) along the peripheral surface, a slope surface (11) that slopes in such a way as to gradually enlarge a space with respect to the peripheral surface, first screw projections (12) formed on the slope surface and the sliding surface, first screw projections extend from the slope

surface to a middle of the sliding surface (the first screw projection extends to the middle of the sliding surface), second screw projections (18) formed on the sliding surface, an end (12b) on a sliding surface side of the first screw projection is formed in a shape cut out along the sliding surface, and a portion (portion immediately after 12a has a width that is nearly equal) on a slope surface side of the first screw projection has an equal width portion (the portion immediately after 12a) formed in a shape in which height increases toward an atmosphere side with a width kept a nearly equal width (figure 5).

The equal width portion has a cross-section of a nearly pentagonal shape (this is the case since near 12a two sides, a third side almost perpendicular to the two sides, a forth side opposite the third side and an imaginary fifth side opposite the two sides) formed by cutting off both bottom side ends of a triangle.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishigaki et al.
